

WHAT WE DO

Argument-Centered Education builds the capacity of schools to use instructional practices aligned with more demanding academic standards. More rigorous instruction improves school performance and develops students' authentic college-readiness.

We move the needle on students' academic attainment by focusing on upgrading classroom practice. We work with teachers closely and collaboratively, producing professional growth that results in more college-directed learning for all students.

Argument-Centered Education provides three-tiered services and resources:

COLLABORATIVE PROFESSIONAL DEVELOPMENT

We offer a full slate of training and growth venues for teachers to build lasting professional effectiveness.

CURRICULUM DESIGN AND ADAPTATION

From our large library, we tailor specific instructional resources that incorporate rigorous argumentation into curriculum that teachers determine and administrators approve

CLASSROOM-EMBEDDED IMPLEMENTATION COACHING

It's not possible to have a big impact on classroom practice from outside the classroom. We model, support, advise, and provide feedback on classroom implementation of argument-centered, rigorous instruction.
