

Having Kittens & Exponential Growth Evaluation & Response Form

Your group number:

Critiquing group's number:

Critique

Do you agree or disagree with the group's claim (their final answer): _____

Whether or not you agree with the group's claim, make an argument that there is some feature of their solution that is well done and is a "best practice" strategy.

Positive evaluative claim:

Evidence and reasoning to support your positive evaluative claim (evidence should be a factual description of a feature of the group’s solution, and reasoning should explain why this is a “best practice” strategy):

Whether or not you disagree with the group’s claim, make an argument that there is a part of their solution that is flawed, wrongly assumed, computed improperly, or incorrect.

Critical evaluative claim:

Evidence and reasoning to support your critical evaluative claim (evidence should be a factual description of a feature of the group’s solution, and reasoning should explain why this is NOT a “best practice” strategy):

Response to the evaluation of your solution:

To the positive evaluation:

Response to the critical evaluation:
